# Token Audit Report - Jamescoin.io

Conducted by KYCAUDITPROOF

## Token Contract Address:

2s37iUf6g98as4o6283BJ1RUvLKr5ocHr5hpHXiYoHAK

<https://solscan.io/token/2s37iUf6g98as4o6283BJ1RUvLKr5ocHr5hpHXiYoHAK>

Total Token Supply: 10,000,000,000

## Conclusion:

The audit conducted by KYCAUDITPROOF confirms that Jamescoin.io has successfully passed the evaluation process.

The implemented safeguards, such as the revocation of freeze and mint authorities, contribute to the overall security of the token.

The smart contract code is robust, and the token distribution aligns with standard practices.

## Audit Findings:

### Revoke Freeze Authority:

**Status: Completed**

The freeze authority has been successfully revoked, ensuring that the token remains transferable without any unnecessary restrictions.

### Revoke Mint Authority:

**Status: Completed**

The mint authority has been successfully revoked, preventing any unauthorized creation of new tokens. This adds a layer of security to the token's total supply.

### **Smart Contract Security:**

The smart contract code has been reviewed, and no vulnerabilities or issues that could compromise the security of the token were identified.

### **Token Distribution:**

A thorough analysis of token distribution has been conducted. The distribution aligns with the project's goals, and there are no anomalies or concerning patterns.

### **Decentralization:**

The token's decentralization features have been assessed, and there are no indications of central control that could pose risks to the project's integrity.

### **Recommendations (if any):**

No specific recommendations are made at this time.  
The token appears to be well-secured and compliant with industry standards.
